DYNAMICS

INDIVIDUAL APPROACH

Company in Lithuania UAB is a team of specialists who will help to open a company and develop business in Lithuania. We will introduce you to Lithuanian business environment as soon as possible.

In addition to the establishment of companies, accounting services and legal advice, we offer our clients assistance in obtaining cryptocurrency licenses and recruiting personnel.

We speak six languages (English, Spanish, Lithuanian, Latvian, Estonian and Russian), so we can answer all your questions about doing business in Lithuania in your native language!

4 | Ready-Made/Shelf Companies in Lithuania

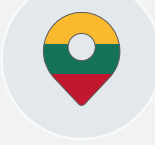

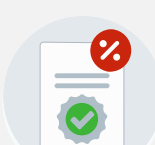

The most efficient way to register a company in Lithuania is to buy a new ready-made company. This legal procedure can be carried out completely remotely without the need to visit Lithuania. In addition, if a ready-made company is purchased, there is no need to contribute capital (2,500 euros) as it is already fully formed. In most cases, non-residents of Lithuania choose this option of company registration in Lithuania to save time and avoid a lot of bureaucratic procedures.

[More info](#) 

BASIC REQUIREMENTS

- ✓ The documents submitted must comply with the requirements of the legal acts regulating EMI activities and their supervision.
- ✓ The documents must comply with the requirements of legal acts regulating the activities of electronic money institutions.
- ✓ Compliance with the minimum statutory capital requirements for EMI: EMI must have paid the statutory capital of not less than 350,000 euros.
- ✓ The suitability and appropriateness of EMI and its shareholders or beneficiaries, having a significant stake in the charter capital of the payment institution and / or the right to vote, to be able to ensure the reliable and prudent management of the payment institution, have a good reputation and ensure the financial viability of the project.
- ✓ Suitability and integrity of the heads of the e-money institution.
- ✓ The business plan provided must correspond to the capacity of the EMI founders (shareholders or beneficiaries) to implement it, while the prospective payment institution must be ready to provide financial services at the time of the application.

The e-money institution is a market participant licensed by the Bank of Lithuania who has the right to issue electronic money.

STAGES OF APPLICATION:

- ① Application for the EMI license to the Supervisory Service of the Bank of Lithuania (five working days).
- ② Evaluation of the EMI license application and attached documents (within three months).
- ③ License or refusal to grant a license. The Board of the Bank of Lithuania analyses the submitted documents.
